Question 1
1 / 1 pts

What is used to change the core behavior of a command?

- prompt
- option
- argument
- shell

Incorrect

Question 2

1 / 1 pts

Which Linux Distro is known for being suitable for server deployments and have a notable feature of having telephone based support as well as being stable?

- Gentoo
- RHEL
- OpenSUSE
- Arch Linux

Incorrect

Question 3

1 / 1 pts

Which Linux Distro is known for being suitable for beginner to advanced users and have a notable feature of having good documentation and support?

- Linux Mint
- Debian
- Fedora
- OpenSUSE

Question 4

1 / 1 pts

Which Linux distro is commonly used in mobile devices?

- Red Hat
- Android
- Debian
- Ubuntu

Question 5

1 / 1 pts

Which Linux distro is known to be the most popular desktop operating system?

- Android
- Red Hat
- Ubuntu
- Open SUSE

Question 6

1 / 1 pts

Complete the quote: ***In general, choose the Linux distribution that ___***

- free and open source
- you are using right now
- secure
- is close to your ideal setup

Question 7

1 / 1 pts

How do you reboot a Linux system.

- shutdown -h
- shut down
- shutdown -r now
- shutdown now

Question 8

1 / 1 pts

Which Linux Distro is known for being suitable for beginner to advanced users as well as for server deployments, as well as is known to have a notable feature of its own desktop environment as well as a large software selection?

- Debian
- Ubuntu
- RHEL
- CentOS

Incorrect

Question 9

1 / 1 pts

Which of the following is not often included in paid versions of Linux?

- Printed Manuals
- Installer Disks
- Downloadable Software
- Guaranteed service level response

Incorrect

Question 10

1 / 1 pts

Which of the following is not a characteristic of Fedora Linux?

- Cutting edge
- Software always up to date
- Stable
- Risk of buggy software

Question 11

1 / 1 pts

Which APT command updates the system's database of packages available for installation?

- apt remove
- apt update
- apt install
- apt upgrade

Incorrect

Question 12

1 / 1 pts

Which Linux Distro is known for being suitable for advanced users and have a notable feature of being highly customizeable

- Debian
- Fedora
- Arch Linux
- Ubuntu

Incorrect

Question 13

1 / 1 pts

Which of the following is not a characteristic of a Debian Linux

- Stable
- Longer update cycles
- Generally less buggy
- Software always up to date

Incorrect

Question 14

0 / 1 pts

Which of the following is not common across all Linux Distributions?

- GNU Sofware Tools (e.g. ls, rm)
- Linux Software and Tools
- Linux Kernel

Question 15

1 / 1 pts

What instructs the user to enter a command on the shell?

- prompt
- kernel
- argument
- option

Incorrect

Question 16

1 / 1 pts

Which Linux Distro is known for being suitable for beginners and have a notable feature of being easy to use as well as it usually comes with commonly used proprietary software and drivers?

- Ubuntu
- Linux Mint
- Debian
- Arch Linux

Question 17

1 / 1 pts

Is the following statement True or False?

Learning to use the command line interface is important because it provides more precise control,

greater speed, and the ability to automate tasks

- True
- False

Incorrect

Question 18

0 / 1 pts

Is the following statement True or False?

In the default prompt of a Linux command line interface, the administrator is also known as the super user

- True
- False

Incorrect

Question 19

1 / 1 pts

Is the following statement True or False?

UNIX is originally an operating system before it became Linux

- True
- False

Question 20

1 / 1 pts

Is the following statement True or False?

When using the Linux command line, pressing Tab will auto complete file and folder names

- True
- False

Question 21

1 / 1 pts

Is the following statement True or False?

Ubuntu is known as one of the most popular desktop or server distributions derived from Debian

- True
- False

Question 22

1 / 1 pts

What is the output of the following ?

```
a=12
b=10
echo $((a / b))
```

- 1
- a / b
- Error
- 12 / 10

Question 23

1 / 1 pts

What is the output of the following?

```
var1=defend
echo ${var1}_elbow
```

- defend_elbow
- var1_elbow
- Blank output
- Error

Question 24

1 / 1 pts

What is the output of the following?

```
var1=product
echo ${var1_default}
```

- var1_default
- Blank output
- Error
- product_default

Question 25

1 / 1 pts

What is the output of the following?

```
var1=thank
echo $var1_decorative
```

- thank_decorative
- var1_decorative
- Blank output
- Error

Question 26

1 / 1 pts

What is the output of the following ?

```
a=5
b=11
echo $((a - b))
```

- -6
- a - b
- Error
- 5 - 11

Question 27

1 / 1 pts

What is the output of the following ?

```
a=180
b=10
echo $((a)) / $((b))
```

- 18
- a / b
- 180 / 10
- Error

Question 28

1 / 1 pts

What is the output of the following ?

```
a=4
b=7
echo $((a)) * $((b))
```

- Error
- a * b
- 4 * 7
- 28

Question 29

1 / 1 pts

What is the output of the following ?

```
a=19
b=5
echo $((a * b))
```

- a * b
- Error
- 19 * 5
- 95

Question 30

1 / 1 pts

Which command is used to enable NTP time synchronization?

- sudo timedatectl set-ntp on

- sudo systemctl set-ntp on
- sudo systemctl set-time on
- sudo timedatectl set-time on

Incorrect

Question 31

0 / 1 pts

Which statement best describes the given cron schedule?

5 4 * * 1

- Every 4 minutes starting at 05:00 on Sunday
- At 04:05 on Sunday
- Every 5 minutes starting at 04:00 on Sunday
- At 05:04 on Sunday

Question 32

1 / 1 pts

Is the superuser account that has the privilege to manage the system.

- sudo
- admin
- root
- administrator

Incorrect

Question 33

0 / 1 pts

Which statement best describes the given cron schedule?

5 0 * 8 *

- Every 5 minutes in August
- At 00:05 every 8th day of the month
- At 00:05 in August
- At 05:00 in August

Question 34

1 / 1 pts

Which command is used to check if a service is running or not?

- sudo systemctl <service_name> state
- sudo systemctl status <service_name>
- sudo systemctl <service_name> status
- sudo systemctl state <service_name>

Incorrect

Question 35

0 / 1 pts

How to change date in Linux

- sudo timedatectl set-time <yyyy/mm/dd>
- sudo timedatectl set-time <mm/dd/yyyy>
- sudo timedatectl set-timezone <timezone>
- sudo timedatectl set-ntp <yyyy/mm/dd>

Question 36

1 / 1 pts

Which file contains the network configuration details in Ubuntu Linux?

- .yaml
- .d
- .plan
- .conf

Question 37

1 / 1 pts

Which command is best used to give sudo access to other accounts?

- vi sudoer
- sudo
- vi sudo
- visudo

Incorrect

Question 38

0 / 1 pts

The sticky bit permission prevents non-root, non-owners from deleting a file or directory. What do

the permissions look like when displayed in a listing?

- rwxrwxrwt
- srwxrwxrwx
- rwxrwxrws
- trwxrwxrwx

Question 39

1 / 1 pts

Which file contains the list of users that can use the `sudo` command?

- passwd
- sudoers
- shadow
- group

Incorrect

Question 40

1 / 1 pts

Is the following statement True or False?

In data centers, to ensure power redundancy, you can use either uninterruptible power supplies or electrical generators

- True
- False

Question 41

1 / 1 pts

Is the following statement True or False?

In structured cabling subsystems, a minimum of one telecommunications outlets should be provided for each work area

- True
- False

Incorrect

Question 42

1 / 1 pts

Is the following statement True or False?

Data center cable management may include the use of over floor cable trays and under head cable trays

- True
- False

Question 43

1 / 1 pts

Is the following statement True or False?

In structured cabling subsystems, backbone cabling is the one that provides interconnection between the telecommunications rooms, equipment rooms, access provider spaces, and entrance facilities

- True
- False

Question 44

1 / 1 pts

Which of the following is being described in the TIA/EIA-568-B Structured Cabling System?

- Horizontal
- Entrance Facility
- Backbone
- Equipment Room

Incorrect

Question 45

0 / 1 pts

Which command is used to create a link to a file or directory?

- alias
- ls
- ln

- link

Incorrect

Question 46

0 / 1 pts

What is used to provide additional information to a command?

- option
- argument
- prompt
- shell

Question 47

1 / 1 pts

What is the shortcut symbol for a user's home directory?

- -
- _
- ~
- =

Question 48

1 / 1 pts

What is used to change the core behavior of a command?

- argument
- option
- prompt
- shell

Question 49

1 / 1 pts

Which command is used to create an empty file?

- do
- touch
- create
- make

Question 50

1 / 1 pts

Which command is used to move a file to a target destination?

- move
- mv
- cd
- cp

Question 51

1 / 1 pts

Which command is used to display the current working directory?

- mkdir
- pwd
- cd
- rmdir

Question 52

1 / 1 pts

Which command prints the first *n* lines of a file?

- head
- start
- cat
- tail

Question 53

1 / 1 pts

Which command is used to change permissions of a file or directory?

- chown
- cmod
- cat
- chmod

Question 54

1 / 1 pts

Which command prints all of the contents of a file with paging capability?

- print
- cat
- many
- more

Question 55

1 / 1 pts

Which command is used to create a copy of a file to a target destination?

- cd
- mv
- copy
- cp

Question 56

1 / 1 pts

What do you call the topmost directory in the Linux file hierarchy?

- root or $
- root or /
- root or ~
- root or \

Question 57

1 / 1 pts

Which command filters the output of the file contents based on a pattern?

- grep
- cat
- grip
- more

Question 58

1 / 1 pts

Which symbol is used to pass the output of one command to another?

- /
- |
- \

- >

Question 59

1 / 1 pts

Is the following statement True or False?

Servers that have no side access features would enable easier access to the servers on the front and back of the server rack. Having no side access would also allow server racks to be placed beside on another, reducing wasted space in a data center

- True
- False

Question 60

1 / 1 pts

Is the following statement True or False?

Compared to other server types, blade servers are well known for having module design chassis, resulting in higher computing capacity in relation to space consumed

- True
- False

Incorrect

Question 61

0 / 1 pts

Is the following statement True or False?

Servers can enhance reliability by having a management console in the same network band and hardware with the host operating system

- True
- False

Incorrect

Question 62

0 / 1 pts

Is the following statement True or False?

Servers can enhance reliability by having hot swappable components such as storage drives and network adapters

- ○ True
- • False

Incorrect

Question 63

0 / 1 pts

Is the following statement True or False?

Compared to other server types, rack type servers can user standard components sizes

- • True
- ○ False

Incorrect

Question 64

0 / 1 pts

Is the following statement True or False?

In Linux, file ACL permissions can be set on a per user or per host basis rather than generalized permissions as opposed to the traditional method

- • True
- ○ False

Question 65

1 / 1 pts

Is the following statement True or False?

THE

- • True
- ○ False

Question 66

1 / 1 pts

Is the following statement True or False?

The group assignments of a user can be determined at the /etc/users file

- True
- False

Question 67
1 / 1 pts

Is the following statement True or False?

The system file of /etc/shadow contains the plain text passwords of user accounts

- True
- False

Question 68
1 / 1 pts

Is the following statement True or False?

The chown command may be executed by the file or directory owner, to transfer ownership to another user

- True
- False

Question 69
1 / 1 pts

Is the following statement True or False?

In Linux, file ACLs are known to provide a more flexible manner of granting access to files and directories

- True
- False

Incorrect

Question 70
0 / 1 pts

Is the statement below True or False?

The system file of /etc/passwd contains the hashed passwords of user accounts

- True
- False

Question 71
1 / 1 pts

Is the following statement True or False?

When creating a user using the useradd command, the home directory is created by default

- True
- False

Question 72
1 / 1 pts

Is the following statement True or False?

It is good practice to login directly using the root account, to ensure proper permissions every time

- True
- False

Question 73
1 / 1 pts

Is the following statement True or False?

The system file /etc/passwd contains the list of user accounts

- True
- False

Question 74
1 / 1 pts

Is the following statement True or False?

THE

- True
- False

Incorrect

Question 75

0 / 1 pts

Is the following statement True or False?

The groupmod command allows modification of the file permissions of a group

- True
- False

Incorrect

Question 76

0 / 1 pts

Is the following statement True or False?

By default, users with UID of 0-199 are accounts for system services

- True
- False

Incorrect

Question 77

0 / 1 pts

Is the following statement True or False?

The who command shows the username of the currently active users

- True
- False

Question 78

1 / 1 pts

What is the output of the following ?

```
a=20
```

```
b=9
echo a + b
```

- a + b
- Error
- 29
- 20 + 9

Question 79

1 / 1 pts

What is the output of the following ?

```
a=12
b=3
echo $a - $b
```

- 9
- 12 - 3
- a - b
- Error

Question 80

1 / 1 pts

What is the output of the following?

```
var1=prescription
echo ${var1}_album
```

- prescription_album
- Error
- var1_album
- Blank output

Question 81

1 / 1 pts

What is the output of the following ?

```
a=5
b=15
echo a - b
```

- 5 - 15
- -10
- a - b
- Error

Question 82

1 / 1 pts

What is the output of the following ?

```
a=18
b=18
echo a * b
```

- a * b
- Error
- 18 * 18
- 324

Question 83

1 / 1 pts

What is the output of the following?

```
var1=photography
echo $var1_current
```

- Blank output
- Error
- var1_current
- photography_current

Question 84

1 / 1 pts

What is the output of the following?

```
var1=hunter
echo $var1_seasonal
```

- Blank output
- Error
- hunter_seasonal
- var1_seasonal

Question 85

1 / 1 pts

What is the output of the following ?

```
a=6
b=10
echo $a * $b
```

- Error
- a * b
- 6 * 10
- 60

Question 86

1 / 1 pts

Which web server software provides load balancing?

- APACHE
- NGINX
- OPENSSH
- OPENSSL

Question 87

1 / 1 pts

Is the following statement True or False?

HTTP is known as a Textual protocol since all commands are plain-text and human readable, not

encrypted

- True
- False

Question 88

1 / 1 pts

This web security practice allows the encryption of data between the client and the server.

- Use of anti-DDOS tools
- Use of HTTPS
- Use of role-based accounts
- Multi-factor authentication

Question 89

1 / 1 pts

Which HTTP response status code states that the resource is missing?

- 403
- 402
- 404
- 401

Question 90

1 / 1 pts

Is the following statement True or False?

A web server refers to how web users access hosted files as well as the computer that stores those hosted files

- True
- False

Question 91

1 / 1 pts

What do you call linked web documents?

- HyperText
- HyperParameter
- HyperPage

- HyperState

Incorrect

Question 92

0 / 1 pts

Is the following statement True or False?

In web access, when the HTTP request reaches the correct webserver, the HTTP server accepts the request, finds the requested document, then sends is back to the browser through FTP

- True
- False

Question 93

1 / 1 pts

Is the following statement True or False?

A static website is a computer with an HTTP server and a database, because the server updates the hosted files before sending the content to the browser

- True
- False

Incorrect

Question 94

0 / 1 pts

What must be provided when requesting a file using HTTP/HTTPS?

- Ubiquitous Resource Locator
- Universal Resource Locator
- Uniform Resource Locator
- Unified Resource Locator

Question 95

1 / 1 pts

Is the following statement True or False?

In web servers, Apache is open source but NGINX is closed source

- ○ True
- • False

Question 96

1 / 1 pts

Is the following statement True or False?

The job of a sysadmin is to keep systems in a useful state for users

- • True
- ○ False

Incorrect

Question 97

0 / 1 pts

Is the following statement True or False?

The Service Desk is also known as the Problem Solving System

- • True
- ○ False

Question 98

1 / 1 pts

Which of the following philosophies of a sysadmin is best described by the following:

Informing people how to get help and defining the responsibilities of a sysadmin

- • Delegate tasks if they're simple enough
- ○ Automate as much as possible
- ○ Document Everything
- ○ Know your users, know your business

Question 99

1 / 1 pts

Which of the following philosophies of a sysadmin is best described by the following:

The best way to avoid confusion and panic among users

- Automate as much as possible
- Know your users, know your business
- Plan ahead, but expect the unexpected
- Communicate as much as possible

Question 100

1 / 1 pts

Is the following statement True or False?

In Evard's life cycle of a machine and its OS, a computer that is in the Off state refers to a computer that is currently in a Turned Off Mode, which needs to be Powered On before use

- True
- False

Quiz Score: 81 out of 100
